

# DELIMITER DE70

## DELIMITER

THE ENNAT DELIMITER IS DESIGNED TO GENERATE A LOW BARRIER WITHOUT OBSTACLES THAT DISTANCES HAZARDOUS ELEMENTS FROM WHAT IT IS WANTED TO PROTECT, SUCH AS COLD CHAMBER PANELS, MACHINERY OR TO DELIMITATE STORAGE AREAS FOR PALLETS THAT CANNOT BE EXCEEDED. THANKS TO ITS FRAMES ON BOTH SIDES, IT IS ALSO EFFECTIVE TO DELIMIT AREAS AND ZONES OF CIRCULATION THAT DO NOT REQUIRE PEDESTRIAN LIMITS. ITS CONSTRUCTION BASE CONSIDERS A SOLID SECTION OF MATERIAL TO ENSURE STRENGTH AND DURABILITY.

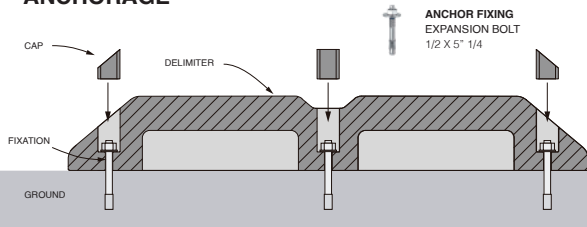

### APPLICATIONS

DELIMITATION OF AREAS, PROTECTION OF PARTITIONS AND COLD CHAMBERS, STOP INDICATOR FOR THE HANDLING AND STORAGE OF PALLETS.

## TECHNICAL INFORMATION

Weight	8 kg
T° Range	-20°C a 70°C
Surface Finish	Soft black rubber with yellow stripes
Anchor Type	1/2" x 4 1/4" Anchor Bolt (3 units per base)
Materiality	NR Rubber
